Office Action Summary

Art Unit: 2829

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 19-22, drawn to a method of testing an integrated circuit, classified in class 324, subclass 765.
- II. Claims 23-44, drawn to a method of forming an integrated circuit, classified in class 438, subclass 19.

The inventions are distinct, each from the other because:

Inventions II and I are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions do not require each other.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to Ernest F. Karlsen at telephone number 703-305-4768.
